Contents & Purpose

Le latin facile is a mini textbook of Latin grammar. The author wants to convince the reader that Latin is not dead because it is still present in the French language: it is responsible for 85% of its vocabulary and that is why it is not so difficult to learn. Though the textbook is really of pocket size (8,5x12cm), it contains a 160-page full grammar course starting from Latin pronunciation according to French rules, through declensions and conjugation, to the syntax. There is also a glossary divided into thematic groups including Latin words used today. In the end, there is also a section with famous phrases, proverbs and quotations.

The references to classical antiquity are not many, but they do appear even in such a small textbook. First of all, on the cover, a witty illustration: a she-wolf sits holding twins, presumably Remus and Romulus, on her lap and they sing together the declension of *rosa* (which to the French evokes the song *Rosa* by Jacques Brel). The introduction to the book presents Latin as the foundation of numerous Western institutions (senate, republic, president, minister etc), but also as a language which has been impacting myth, thought and literature through its writers such as Seneca, Virgil, Ovid, Horace, Plautus or Cicero. At the end of the book, one can find a collection of famous quotes to be learned in the original Latin, along with explanations of their meaning and provenance.
